smartIAQ Hub-4 Pro

PRODUCT DATA SHEET

smartIAQ® GridSet™ Low Voltage Power Supply Unit

PRODUCT DESCRIPTION

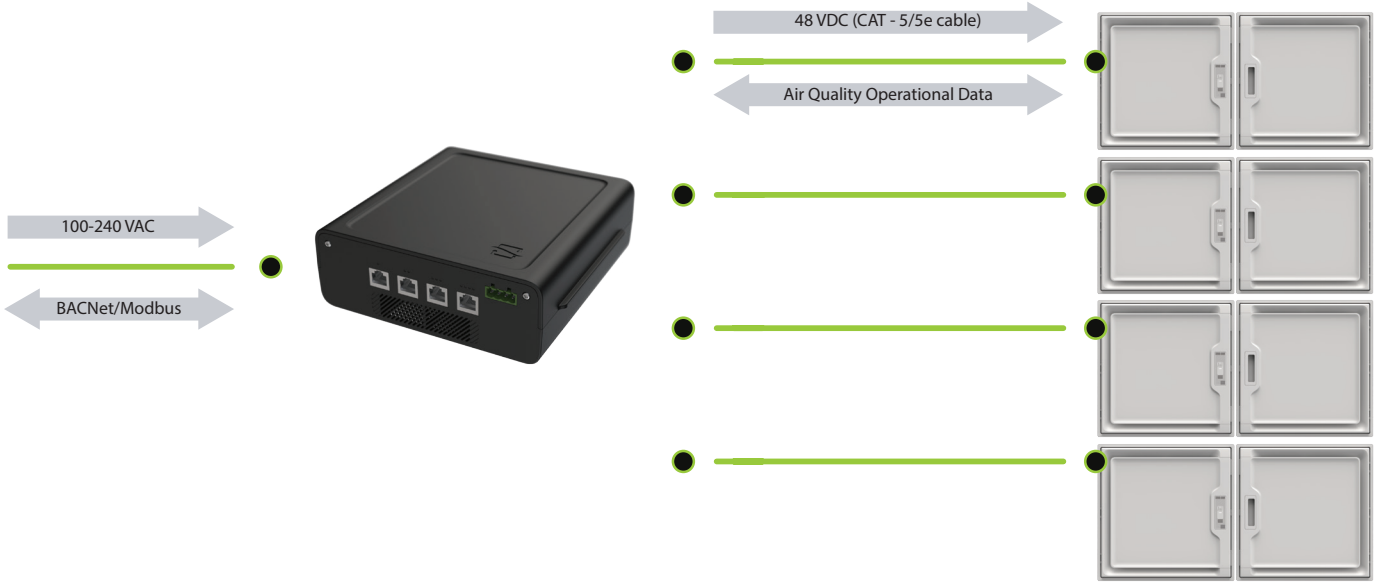

The smartIAQ Hub-4 Pro delivers a streamlined power and BMS communication solution for up to four smartIAQ GridSet Pro units, helping reduce installation costs and complexity. With only a single incoming mains connection, the Hub-4 Pro distributes low-voltage power to multiple devices using simple plug-and-play Ethernet-style cables—no downstream hard wiring, conduit, or specialized labor required. In addition, the Hub-4 Pro facilitates BMS integration for GridSet Pro units. Full control and data communication can be managed by appropriately configured Building Management Systems.

Its extended low-voltage cabling capability allows the Hub-4 to be positioned conveniently near existing power sources while reliably supplying GridSet units located throughout the space. The result is a clean, flexible, and cost-effective installation tailored for modern IAQP deployments.

STANDARD FEATURES

- Single power connection (input) to Hub
- 48 VDC Low Voltage outputs for up to 4 smartIAQ GridSet Pro units
- BMS integration via RS-485 port, works with:
    - BACnet (sIAQ-HBP4-BN)
- Uses CAT-5/5e wiring
    - Max 300ft per GridSet unit
- Rated for Plenum Applications
- 1/2" Trade size knock-out for standard electrical gland

End Elevation

SIAQ-HB4P-BN: SPECIFICATIONS

Input Voltage	110 -240 VAC 50/60Hz
Output Voltage	48 VDC
Power Consumption	200 W (Max)
Minimum Circuit Amps (MCA)	5.25 A
Temperature Range	0 - 140 F
Humidity Range	20 - 90% RH (non-condensing)

Dimensions (L x W x H)	7.125 " x 7.25" x 2.66"
Weight	2.5 lbs
GridSet Units Served	Up to 4 (Max)
Gridset Compatibility	Power Supply Only
Gridset Pro Compatibility	Power Supply and BMS Communication
Compliance and Certifications	UL 62368-1, CSA 22.2 #62368-1
